

The workshop was very interesting. I like the challenge and I enjoy how people here treated me as a member

I liked the fact that both simulation produced a ~~visual~~ visual output

good amount of new content, the morning presentations weren't too overwhelming and I felt like I picked up useful knowledge

I really liked the challenge simulations! I hope I can make some time for working on the fluid sim on my own.

We could have a go at implementing some algorithm from scratch (rather than optimising existing simulations)

Friendly helpful staff,  
delicious cookies

Great welcome,  
nice talk and free cookies!
